Manual

1. Control Center

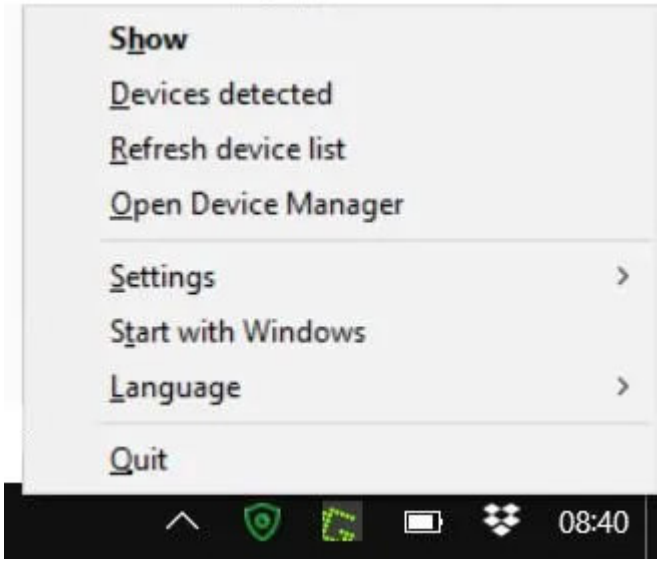
2. System tray icon / program settings

1. Control Center

Use the toggle buttons to disable/enable all of your webcams/microphones. Disabled devices will be invisible to other programs. Click the cogwheel icon to open the program settings.

2. System tray icon / program settings

While the program is running, an icon is displayed in the system tray. Right-click it to bring up the context menu:



Show
Opens Control Center.

Devices detected
Displays a list of currently detected devices, including their connection status.

Refresh device list
Runs the hardware detection again.

Open Device Manager
Launches the Windows-default device manager.

Settings

Display a notification when the webcam is active/inactive in Windows 10
If enabled, you'll receive a notifiction through Windows' notification system when the operating state of your devices changes.

Webcam privacy settings (Windows)
Displays the Windows-default webcam-related privacy settings.

Microphone privacy settings (Windows)
Displays the Windows-default microphone-related privacy settings.

Start with Windows
If enabled, the application will auto-launch with Windows. This way, you can ensure that your webcam/microphone is disabled until you really need it.

Language
Allows you to change the program language.

Quit

Terminates the application.
